

## Keyword Index Volume 2 (2013)

AFM	191	fluorescent dyes	349
AGE	301	Fourier transform infrared spectroscopy	83
Alzheimer's disease	129	FTIR	115, 331
amyloid plaques	129	FTIR microspectroscopy	317
anatomical MRI	21	full width at half-maximum (FWHM)	37
anatomical variability	199	Fuzzy c-means clustering	199
anticoagulants	317		
arsenic	225	G protein-coupled receptors	155
		genome	1
baseline	225	geographic origin	101
bladder wall	91	glucose	51
blood plasma	317	glycation	301
		glycemia	301
cancer	51	glyoxylic acid	339
cell nuclei	191	gold nanoparticles	183, 349
chirality	359		
chromophore	289	<sup>1</sup> H NMR	9
cinchona alkaloids	359	hemodynamics	289
cinchonidine	359	herbal medicines	101
cinchonine	359	high-throughput mass spectrometry	1
cluster analysis	331	history	245
CNR	21	hydrogen bond	141
computational chemistry	339		
conformers	339	imaging	51, 331
copper	129	immunohistochemical staining	191
counterfeit check	101	<i>in vivo</i>	51
cryobiology	83	<i>in vivo</i> Raman spectroscopy	199
cryopreservation	83	infrared	301
CVD	301	infrared microscopy	129
		infrared spectroscopy	101
DDA	51	integrin activation	245
detrusor	91, 289	intrinsically disordered proteins	245
diabetes	301	iron	129
diagnosis	73	isolation	9
diffuse reflectance spectrophotometry	219		
diffusion tensor imaging	265	laser excitation	339
dynamics	245	light emitting diodes	289
		lipid droplets	9
elastin fibers	191	lipids	331
endothelium	191	lithography	51
endothelium cells	183	liver	331
entropy	245	long bones	21
ethnicity	225		
		macrophages	349
fasting	225	magnetic resonance imaging	265
FDTD	51	magnets	245
filamin	245	matrix isolation	339
fluorescence	301	membrane phase behavior	83

metabolism	1	S-state cycle	115
Mie theory	51	screening	73
Mn <sub>4</sub> CaO <sub>5</sub> cluster	115	selenium	225
molecular monolayer	141	SERS	51, 183
		SERS imaging	349
N <sup>•</sup> -(carboxymethyl)lysine	301	skin phototype	219
nanoparticles	51	SNR	21
nanostructure fabrication	51	solar exposure	219
near-infrared spectroscopy	91, 289	solar radiation	219
nuclear magnetic resonance	245	spatially resolved spectroscopy	289
nuclear magnetic resonance spectroscopy	265	spin relaxation times	21
nucleic acids bases	37	staining	331
		Stejskal–Tanner plot	265
oral cavity	199	Stokes–Einstein formula	265
ORO	331	structure	245
oxygen evolution	115	subpicosecond global relaxation time	37
		sugar	301
PAGE	301	surface plasmon resonance	155
pentosidine	301	surface-enhanced Raman spectroscopy	51
phospholipid	141		
photosynthesis	115	time-resolved infrared spectroscopy	115
plasmonics	51	tissue oxygen saturation	289
probabilistic multi-class diagnostic algorithm	199	toxicity	225
protein–protein interactions	245	transcriptome	1
proteins	245	transgenic mice	129
proteome	1	two-dimensional correlation spectroscopy	101
quantum chemical calculation	141	urea	141
quinidine	359	urine	225
quinine	359		
RAGE	301	vesical microcirculation	91
Ramadan	225	vessel wall	191
Raman imaging	191	vibrational overtones	339
Raman mapping	331	vibrational spectroscopy	73
Raman reporters	349	voiding dysfunction	91
Raman spectroscopy	37, 141, 339		
ratio	225	water oxidation	115
restricted diffusion	265		
rhodamine 6G	183	X-ray absorption spectroscopy	129
ROA	359	X-ray fluorescence microscopy	129
