

ERRATUM

Tamamushi, B.: Flow properties of smectic liquid crystals. *Biorheology* **10**, 239–247, 1973.

In Figs. 1, 2, 4, 5, 7 and 8 shear force, dyn/cm^{-2}
should read shear force, $\text{dyn}\cdot\text{cm}^{-2}$.

In Figs. 2 and 3, the scale numbers of viscosity should be divided by 10.

In Figs. 10 and 11 shear force, $\text{dyn/cm}^{-2} \times 10^3$
should read shear force, $\text{dyn}\cdot\text{cm}^{-2} \times 10^2$.
