EDITORIAL

This issue contains three Symposia as Part II of the Fifth International Congress of Biorheology, Baden-Baden, F.R. Germany, 20-24 August 1983. They are: 1. "Theoretical Considerations in Biorheology", Editor S. Oka and Guest Editor D. Lerche. 2. "Tumor Microcirculation", Guest Editors K. Messmer and B. Endrich. 3. "Rheology and Atherogenesis (Alexander Naumann Memorial Symposium)", Guest Editors R.M. Nerem and D. Liepsch.

One of the three Symposia was held on August 24, the day of the joint sessions of the Fifth International Congress of Biorheology and of the 3rd European Conference on Clinical Haemorheology. As this Symposium does not concern clinical hemorheology, but deals with theoretical and experimental hemorheology, it is published in BIORHEOLOGY in accordance with our Editorial policy. The Symposium constitutes also Part II of the Proceedings of the 3rd European Conference on Clinical Haemorheology. Part I of the Proceedings is published in CLINICAL HEMORHEOLOGY, Volume 4, 2/3 1984.

The Editors of the Proceedings of the Fifth International Congress of Biorheology are Alfred L. Copley and Siegfried Witte, while the Editors of the Proceedings of the 3rd European Conference on Clinical Haemorheology are Alfred L. Copley, Holger Schmid-Schönbein and Horst Rieger.

Alfred L. Copley
