

SPECIAL ISSUE  
**Erythrocyte Aggregation**  
**Proceedings of an International Symposium**  
**Geneva, Switzerland 11 January, 1986**

CONTENTS

J.F. Stoltz	1	<i>Foreword</i>
A.L. Copley	3	<i>Introduction</i> On Erythrocyte Aggregation and Desaggregation <i>Papers</i>
J.F. Stoltz and M. Donner	15	Hemorheology: Importance of erythrocyte aggregation
P. Boivin	25	Biochemical parameters of red blood cell deformability
M. Donner, S. Muller and J.F. Stoltz	33	Molecular rheology: Definition, approach methods and clinical aspects
C. Lacombe and J.C. Lelièvre	47	Interpretation of rheograms for assessing RBC aggregation and deformability
M. Lucius and J.F. Stoltz	63	Importance of erythrocyte aggregation on the visco-elastic and thixotropic properties of blood
S. Chien and L.A. Sung	71	Physicochemical basis and clinical implications of red cell aggregation
G.B. Nash, R.B. Wenby, S.O. Sowemimo-Coker and H.J. Meiselman	93	Influence of cellular properties on red cell aggregation
J.F. Stoltz, F. Paulus and M. Donner	109	Experimental approaches to erythrocyte aggregation
J.A. Dormandy and G. Nash	119	Importance of red cell aggregation in venous pathology
M.C. Laprevote-Heully, A. Larcen, P.E. Bollaert, S. Muller, M. Donner, F. Streiff and J.F. Stoltz	123	Hemorheological disturbances during thrombo-embolic states and various attacks
J.F. Stoltz and M. Donner	131	Erythrocyte aggregation: Therapeutic aspects
S. Chien	137	Summary and conclusions
	141	Announcement
	I	Software Survey Section
