

Publications by Syoten Oka\*

1. OKA, S. On the instability and breaking-up of a ring of liquid into small drops. Proc. Phys. -Math. Soc. Japan 18, 524-534, 1936.
2. OKA, S. Über die Drehung von Molekülen in polaren Flüssigkeiten. Proc. Phys. -Math. Soc. Japan 20, 391-398, 1938.
3. OKA, S. Zur Theorie der akustischen Doppelbrechung von kolloidalen Lösungen. Z. f. Phys, 116, 632-651, 1940.
4. OKA, S. Zur Theorie der statistischen Molekülgestalt hochpolymerer Kettenmoleküle unter Berücksichtigung der Behinderung der freien Drehbarkeit. Proc. Phys. -Math. Soc. Japan 24, 657-672, 1942.
5. OGAWA, S. and OKA, S. Theory of electric birefringence in dilute solutions of tobacco mosaic virus. J. Phys. Soc. Japan 15, 658-668, 1960.
6. OKA, S. Principles of Rheometry. In: Rheology. F.R.Eirich (Ed.). Vol.3, New York, Academic Press, 1960, pp.17-82.
7. Oka, S. Theoretical approach to the effect of wall surface condition in hemorheology. Hemorheology. Proc. 1. International Conference. A. L. Copley (Ed.). New York-Oxford, Pergamon Press, 1968, pp. 55-65.
8. OKA, S. and MURATA, T. A theoretical study of the flow of blood in a capillary with permeable wall. Jap. J. Appl. Phys. 9, 345-352, 1970.
9. OKA, S. and AZUMA, T. Physical theory of tension in thick-walled blood vessels in equilibrium. Biorheology 7, 109-117, 1970.
10. AZUMA, T. and OKA, S. Mechanical equilibrium of blood vessel walls. Am. J. Physiol. 221, 1310-1318, 1971.
11. OKA, S. Some theoretical studies on hemorheology. In: Advanc. in Biophys. Kotani, M.(Ed.). University of Tokyo Press, Vol.3, 1972, pp.97-160.
12. CHU, B.M. and OKA, S. Influence of longitudinal tethering on the tension in thick-walled blood vessels in equilibrium. Biorheology 10, 517-525, 1973.
13. OKA, S. Poiseuille Gold Medal award ceremony presentation address. Biorheology 15, 389-390, 1978.
14. OKA, S. Physical theory of permeability of vascular walls in relation to atherogenesis. Biorheology 16, 203-209, 1979.

---

\* A Selection made by Eiichi Fukada and Takehiko Azuma (2 pages)

15. OKA, S. Cardiovascular Hemorheology. Cambridge, Cambridge University Press, 1981.
16. OKA, S. Physical theory of some interface phenomena in hemorheology. Ann. N. Y. Acad. Sci. 416, 115-127, 1983.
17. OKA, S. A physical theory of erythrocyte sedimentation. Biorheology 22, 315-321, 1985.
18. ABE, K., TAKANO, Y. and OKA, S. A note on a theoretical study of erythrocyte sedimentation in inclined tubes. Biorheology 23, 17-23, 1986.
19. OKA, S. and NAKAI, M. Optimality principle in vascular branching. Biorheology, in press.
20. OKA, S. Microcirculatory Dysfunction in an Environment of Weightlessness. Microcirculation in Circulatory Disorders, Tokyo, Springer-Verlag, 1988, in press.
21. OKA, S. Biomedical aspect of microcirculation associated with spaceflight. In: Proceedings of the Second Japan-U.S.A.-China Conference on Biomechanics, Tokyo, Mita Press, 1988, in press.
