

Notice of Retraction

IOS Press has retracted the following publication from its online content:

[*Cancer Biomarkers* 20(4) (2017), 453–460]
DOI: 10.3233/CBM-170249

HP1 α is highly expressed in glioma cells and facilitates cell proliferation and survival

Xianliang Lai, Zhifeng Deng, Hua Guo, Xingen Zhu and Wei Tu

Department of Neurosurgery, The Second Affiliated Hospital of Nanchang University, Nanchang 330006, Jiangxi, China

The authors state: “One of our authors found serious issues with some data. We made some mistakes on some tissue samples. These experiments probably should be re-performed, and we think it is important to double check the other data of the manuscript”.

However, this seems to be a case of unethical behavior, with simultaneous submission to *Biochemical and Biophysical Research Communications*, where the paper appears in: Volume 490, Issue 2, 19 August 2017, Pages 415–422

Biochemical and Biophysical Research Communications received the manuscript on 29 May 2017, when it was under review with *Cancer Biomarkers*.
