

## Notice of retraction

---

IOS Press has retracted the following publication from its online content: [Cancer Biomarkers, 21(2) (2018), 489–498]  
DOI: 10.3233/CBM-170802

### **The targeted regulation of Gli1 by miR-361 to inhibit epithelia-mesenchymal transition and invasion of esophageal carcinoma cells**

Pingping Lin<sup>a</sup>, Qingsong Pang<sup>a</sup>, Ping Wang<sup>a</sup>, Xiyong Lv<sup>b</sup>, Lanfang Liu<sup>b</sup> and Aike Li<sup>b</sup>

<sup>a</sup>Radiotherapy Department, Tianjin Medical University Cancer Hospital, Tianjin, China

<sup>b</sup>Ocology Department, Chengde Medical College Affiliated Hospital, Chengde, Hebei, China

The above article originally published in Cancer Biomarkers volume 21, number 2, 2018, pp. 489–498 has been retracted in consultation between the corresponding author and the publisher of Cancer Biomarkers because of substantial deficiency in the experimental design. In order to ensure the scientificity and integrity of the research, the journal has decided to retract it from its online catalogue.
