

Notice of retraction

IOS Press has retracted the following publication from its online content: [Cancer Biomarkers, 28(4) (2020), 473–482] 10.3233/CBM-190945

Long non-coding RNA LINC01116 regulated miR-744-5p/SCN1B axis to exacerbate lung squamous cell carcinoma

Xiangyu Fan^a, Yingying Sun^b, Xu Guo^a, Chunbo He^a, Beiqiu Han^a and Xilin Sun^{a,b}

^a*Department of Radiation Oncology, The Fourth Hospital of Harbin Medical University, Haerbin, Heilongjiang, China*

^b*TOF-PET/CT/MR Center, The Fourth Hospital of Harbin Medical University, Haerbin, Heilongjiang, China*

The above article, originally published in Cancer Biomarkers volume 28, number 4, 2020, pp. 473–482, has been retracted from its online catalogue in consultation between the first author, the corresponding author and the publisher of Cancer Biomarkers.

Upon inspection it was found that the article was submitted without the knowledge or permission of the last author, Xilin Sun. The provided email address and signature of the corresponding author have been counterfeited and do not represent the actual signature and email address of Xilin Sun.

In this light the journal cannot condone publication of this paper and has decided to retract it from its online catalogue.
