

Notice of retraction

IOS Press has retracted the following publication from its online content: [Cancer Biomarkers, 27(1) (2020), 105–111] 10.3233/CBM-190555

MiR-155 targeting FoxO3a regulates oral cancer cell proliferation, apoptosis, and DDP resistance through targeting FoxO3a

Xiaoting Li^a, Kun Liu^a, Wei Zhou^b and Zhe Jiang^c

^aDepartment of Stomatology, Chengdu Women's and Children's Central Hospital, School of Medicine, University of Electronic Science and Technology of China, Chengdu, Sichuan, China

^bState Key Laboratory of Military Stomatology and National Clinical Research Center for Oral Diseases and Shaanxi Key Laboratory of Stomatology, Department of Prosthodontics, School of Stomatology, The Fourth Military Medical University, Xi'an, Shaanxi, China

^cState Key Laboratory of Military Stomatology and National Clinical Research Center for Oral Diseases and Shaanxi Key Laboratory of Stomatology, Department of Operative Dentistry and Endodontics, School of Stomatology, The Fourth Military Medical University, Xi'an, Shaanxi, China

The corresponding author contacted the editorial office requesting the article retraction due to substantial deficiencies in the experimental design, as well as mistakes in the experimental data that could not be modified. After receiving the author's request, the publisher received anonymous allegations of image manipulation that were not refuted by the authors.

In this light the journal cannot condone publication of this paper and has decided to retract it from its online catalogue.
