

EDUCATION AND TRAINING FOR LIBRARIANSHIP AND INFORMATION WORK: ANNUAL BIBLIOGRAPHY, 1986

Alan J. CLARK

College of Librarianship Wales, Aberystwyth, Dyfed SY23 3AS, United Kingdom

Received 29 May 1987

The centenary of the year in which Melvil Dewey founded the first library school in the United States and the year of a major review of librarianship education in Britain seems an appropriate time for *Education for Information* to initiate what is intended to become an annual bibliography of work in librarianship and information science education and training.

The bibliography covers works published in 1986 and is international in scope although the majority of items are in English. In future the coverage of material in other languages will be increased.

The arrangement is by subject and then alphabetically by author or title. The name index includes name subject entries for individuals and institutions. The alphabetical subject index includes entries under names of countries. A list of periodical title abbreviations used is also supplied.

Compilation of the bibliography has used the collections and resources of the College of Librarianship Wales Library. CLW Library itself produces a current awareness bibliography of library education, in its monthly publication *Library Link*. This includes ephemeral, news-type information excluded from this bibliography.

A major retrospective bibliography of library education covering the period 1883–1986 is at present being compiled by John V. Richardson Jr. of the Graduate School of Library and Information Science of the University of California, Los Angeles.
