

Keyword Index Volume 25 (2006)

abduction	211	knowledge	237
aura	211	knowledge intensive activities	145
autopoiesis	247	knowledge mobilisation	211
		knowledge outsourcing	145
balanced socioeconomic development	31	knowledge-sharing	227
business process outsourcing	145		
		license plate recognition (LPR)	71
cellular form	103	lightweight	265
chaos theory	247	low knowledge	211
charge couple devices (CCD)	71		
closed loop supply chain	51	management by objective	185
commitment to learning	227	management information system (MIS)	71
competitive strategy	255	management of innovation	103
comprehensive human development	31	market fundamentalism	31
computers	161	methodology	265
convenience	279	middleweight	265
Credibility Trap	31	modelling of social systems	247
cultural enrichment	31	multi-level approach	1
cybernetics	247		
		network formation	237
Data Envelopment Analysis	197	new product development	185
demand chain	255		
		offshoring	91, 103, 145
e-commerce	167, 279	openmindedness	227
E-service	279	organizational structure	103
efficiency-based quantitative approach	197	outsourcing	91, 115
encryption	161		
end of life vehicle regulation	51	partnerships	1
		performance measurement	185
firm boundaries	115	personal digital assistant (PDA)	71
firm innovation	227	production efficiency	197
		PSM	13
globalization	103		
Grid Computing	161	qualitative	237
		quality improvement	185
heavyweight	265		
high-technology	237	R&D	103, 237
holistic society-specific cultures	31	RA plan	197
human error	77	re-use	51
human reliability	77	real-time	71
human-computer interaction	211	recycle	51
human-machine system	77	reliability growth	77
		reverse logistics	51
I-Think [©]	13	reverse supply chain	51
India	91		
industrial organization economics	115	SAST	13
information technology	91, 161	security	161, 279
innovation	115	self-organisation	247
internationalization	167	self-regulation	1
Internet	167, 279	services	91
		shared vision	227
Japanese car recycling law	51	site characteristics	279

small and medium enterprise (SMEs)	167	total cost	185
social networks	237	transaction cost economics	115
software development lifecycle model	265	uncertainty	115
stolen-vehicle	71	use intention	279
supply chain	1, 255	user satisfaction	279
sustainability	1	Virtual Enterprises	13
system dynamics	13, 51	vitality augmentation	31
systems analysis and design	265	Web	279
systems thinking	247	wireless local area network (WLAN)	71
tacit knowledge	211		
technology enhanced learning	211
