

Keyword Index Volume 27 (2008)

adaptation	109	game theory	313
adaptive structuration theory	143	globalization	243
analytic hierarchy process (AHP)	49	<i>Guanxi</i>	131
autopoiesis	109	heuristics	295
biodiversity	109	human thinking systems	109
bounded rationality	285, 295	humane ideals	261
BPO	313	incentive reward control	123
build-to-order production network	15	individual intelligence	109
business ecology	305	information modeling	3
business ethics	183	innovation	295
career web site	321	intellectual capital measurement and reporting	217
case study	201	intellectual capital	217
climate change	243	intelligent school/organization/nation	109
collective intelligence	31, 109	interdisciplinary solutions	255
compensation	161	international human resource management	131
competence profile	15	internationalisation strategy	131
competitive advantage	123, 161	IS adoption and use	143
complementors	305	ISO standards	231
complexity	109	Japan	183
computer metaphor	285	justice	273
computer supported decision making	285	knowledge management	15
context	15	Korea	183
contingency	161	learning/relearning	109
cooperation	255	location selection	313
corporate governance	201	longitudinal case study	217
corporate responsibility	243	many peaks of excellence	109
corporate social responsibility	231, 273	market failure	261
corporate strategy	305	Markov chain	63
Deming	89	moral principles	273
design/management for security (DMfSec)	73	multiagent system	31
disruptions	63	multi-objective decision support system	49
Dogan Yayın Holding	201	nonlinearity	109
economic production quantity (EPQ)	63	ontology	15
education policy	109	operations management	231
electronic business	321	optimization	31
embodied rationality	285	organizational life cycle	123
emergence	109	outsourcing	49
entrepreneurship	255	perceived enjoyment	321
environmental analysis	305	performance appraisal	161
e-ordering systems	143	problem solving	255
e-procurement	143	process management	89
ethical and sustainable investment	243		
ethics	261		
feedback	89		
focusing scenario analysis	305		
framework	143		
funnel experiment	89		

randomness	89	survey	183
regulation	305	sustainable development	231, 255
salespeople	123	SWOT	305
security centric supply chain management (SecSCM)	73	system dynamics	89
security management (SecM)	73	systematic framework	161
self-organization	109	Taiwanese/Chinese management	131
self-regulation	231	tampering	89
service quality	321	technology acceptance model	321
service-oriented architecture	3	the computational model of the mind	285
simulation	31, 89	theory of constraints	305
social responsibility	261	transaction cost economics	123
socially and environmentally responsible investment	243	Turkey	201
sourcing decision	49	uncertainty	89
statistical process control (SPC)	89	universities	255
strategy fit	161	USA	183
supplier integration	49	value chain	305
supplier selection	49	value stream	231
supply chain	3	value system	305
supply chain management (SCM)	73, 305		
supply chain network	31
