<i>Net balance</i>		\$9667	

**Figure 3:** Balance Sheet (US Dollars).

Table 1 shows the breakdown of ICCA members. Membership has increased slightly. More significantly, the number of libraries that subscribe to the Journal has risen from 14 to 21. We need more libraries!

Type	Europe	North America	Total
Subscribers	326	218	544
Libraries	12	9	21
Institutional	1	0	1
Gratus	21	8	29
Total	360	235	595

**Table 1:** *ICCA Journal* Distribution.

Putting the numbers in perspective, although the *ICCA Journal* continues to lose money, other activities generate enough income to offset this. As long as ICCA events continue to be profitable, the ICCA will remain in good financial shape. Of course, for 1991 things look very good because of the success in fund raising for the World Micro and World Championship. A glance at previous statements shows that this is not always the case.

### STOP PRESS: New FIDE Ruling

The following information has been provided by telephone and full details will be given in the next issue of the Journal.

At the FIDE Congress in Manila, June 1992, a decision was taken to regularize the situation regarding the participation of computers in human chess tournaments.

To summarize the decision:

1. Computers may only play in tournaments if the computer manufacturer has paid a standard registration fee to FIDE.
2. If a tournament organizer allows the participation of a computer which does not conform to point 1 above then the tournament will not be recognized (and rated) by FIDE.
3. Computers will have a separate FIDE rating list and will be counted for rating purposes.
4. Humans participating in tournaments with computers will not be allowed to refuse to play against the computers.
