

## THE SWEDISH RATING LIST

*ICCA Communication  
by Göran Grotting*

Our familiar list now appears in a completely new format while its range is now clearer for three reasons:

- it is all-Swedish, whilst foreign games were included previously;
- it has been computed by a new program thought to be free from some biases present before;
- conditions of play have now been normalized.

Column heading now stands for

- rating : an ELO-comparable rating calibrated by playing human beings;
- +- : the estimated half-width of a 95% confidence interval around the rating;
- games : the number of games played against competitors, totaling 3962;
- win% : percentage of games won;
- against : arithmetical average rating of opponents.

The results are shown below.
