

## Forthcoming in Information Services & Use

---

### Volume 1, Number 5

This issue will include:

Man and automation in the office, by W. Grünsteidl

An instructional experiment in usage of online information retrieval systems by entry-level end-users, by L.W. Parks, K. Brooks, and R. Lawrence

Report on the Science Information Centre in Japan, by A. Tabohashi

Full word processor/mainframe integration: an information management application in a multi-task environment, by C.P.R. Dubois and J.L. Barron

### Volume 1, Number 6

This issue will contain the papers, and a discussions-summary, from the 1981 Fall Meeting of ASIDIC (Association of Information and Dissemination Centers, USA), on the important and timely topic of "The Re-use and Re-packaging of Bibliographic Information: Issues and Problems" — including:

Richard Huleatt (Information Intelligence, Inc.), on the principles and the technology of "downloading"

Mitchell Krasny (NTIS), on technology of re-use – the problems and the solutions

Arthur Elias (BIOSIS), on the economic issues, from the vendor's point of view

Judy Burnam (Executive Office of the President), on re-packaging and re-use from the user's point of view

Margaret Park (University of Georgia), on the aspects of reporting and accountability
