

Calendar of Events

We provide this selected list of upcoming events as a service to our readers. It gives brief information on various conferences and meetings, corresponding to the scope and interests of this journal, and which are of more than local significance or highly specialized orientation. As a consequence of the always increasing number of such events, space limitations will compel us to list only those which are scheduled to take place within one year of the publication date of a given issue of *ISU*—except that the first issue of each year will publish an extended listing. Workshops, courses and training sessions are, furthermore, expressly excluded.

Of course we can assume no responsibility for the complete accuracy of the information on which individual entries are based. Supplementary entries and updated details are incorporated with each issue, insofar as these come in the meantime to our attention.
