

Keyword Index Volume 28 (2016)

ADRs	13	health system	221
adverse drug reaction	25	heart failure	181
Adverse drug reactions (ADRs)	115		
adverse events	101, 163	imipramine	143
analgesic nephropathy	189	immunogenicity	45
analgesics	189	independent	221
animal studies	1	interchangeability	45
antidepressants	125	Iran	25
antidiabetic drugs	197		
antiretroviral agents	13	key-opinion-leaders	33
attitude	25	knowledge	25
Autism spectrum disorder	125		
bias	221	length of stay	181
biologics	45	long lasting harm	1
biosimilars	45		
chronic renal impairment	189	market discontinuations	197
citalopram	33	measurement/epidemiology	163
clinical trial methodology	101	medical education	61
Cochrane	221	medical error	93, 163
conflicts of interest	221	medical malpractice	213
		medication errors	77
defensive medicine	213	medicine information	221
depression	33, 143	morbidity and mortality meeting	65
disclosure	93		
drug approvals	197	NAFDAC	13
drug promotion	221	neurodevelopmental delay	125
drug safety	101, 197	neurodevelopmental spectrum disorders	125
		Nigeria	77
education	65	non-steroidal anti-inflammatory agents	181
efficacy	45		
epidemiology and detection	163	obligation	93
escitalopram	33	office staff	61
ethical standards	221	orthopaedic surgery	65
evidence	221		
extrapolation	45	paroxetine	143
		patient relationships	61
FDA	33, 197	patient safety incidents	65
		patient safety	65, 163
general practitioners	25	permanent sexual dysfunction	1
ghostwriting	33	pharmaceutical policy	221
		pharmacovigilance	13, 115
health care costs	213	post marketing drug safety	115
health professionals	77	practice	25
		pregnancy	125
		psychiatric litigation	33
		psychotropic drugs	101

relapse	143	serotonin reuptake inhibitors	125
reporting	25	signals	13, 115
research misconduct	33	SSRI antidepressants	33
risk management	163	SSRIs	143
Russia	221	systematic review	1
safety culture	163	taper phase	143
safety	45	tort reform	213
selective serotonin reuptake inhibitors (SSRIs)	1
