On page 275, there is an error in paragraph 2, section “Additional MMSE *post-hoc* analyses”, line 9. In the following sentence, the words “mild” and “severe” were switched. In the original, it reads:

“Tukey’s post-hoc test revealed significant differences ($p < 0.001$) in LE between mild ($M = 35.8$, $SD = 26.6$), moderate ($M = 54.53$, $SD = 27.23$), and severe ($M = 67.14$, $SD = 27.49$) cognitive impairment.”

The correct line is:

“Tukey’s post-hoc test revealed significant differences ($p < 0.001$) in LE between severe ($M = 35.8$, $SD = 26.6$), moderate ($M = 54.53$, $SD = 27.23$), and mild ($M = 67.14$, $SD = 27.49$) cognitive impairment.”
