On page 1557, in the first lines of the Materials and methods section, there was an error in the following sentence:

“App knock-in (KI) mice (App^{NL-G-F}), which overproduce $A\beta$ without overexpressing $A\beta PP$, with the Swedish, Iberian, and Arctic mutations, were obtained from RIKEN Center for Brain Science (Wako, Japan).”

The correct sentence should be:

“App knock-in (KI) mice (App^{NL-G-F}), which overproduce $A\beta$ without overexpressing $A\beta PP$, with the Swedish, Iberian, and Arctic mutations, were provided by the RIKEN BRC through the National Bio-Resource Project of the MEXT, Japan.”
