

IE'09 best paper award by JAISE

During the 5th edition of the International Conference on Intelligent Environments (IE'09) held in Castelldefels (Catalonia, Spain) last July, JAISE provided a prize to the best paper of the conference. The prize for the best paper consists of one year free subscription to JAISE and other products accessible through MetaPress kindly provided by IOS Press, the publisher of JAISE.

The chairs of the conference, informed by the review process conducted by the program committee members, selected the paper:

“Integrating Commonsense in Physically Embedded Intelligent Systems” by Marios Daoutis, Silvia Coradeschi and Amy Loutfi from the University of Örebro (Sweden)

The photo in Fig. 1 shows Achilles Kameas (co-chair of IE'09 and editorial board member of JAISE) communicating the good news to the first author and presenter of the paper. The photo in Fig. 2 shows Juan Carlos Augusto (co-editor in chief of JAISE) congratulating the first author on behalf of JAISE.

JAISE and IOS Press plan to extend this practice to other major events in related fields as a way to stimulate high quality research around the world in the area of Ambient Intelligence and Smart Environments.
