

Editor's Notes

This issue of the *Journal of Clinical Speech and Language Studies* includes four research papers accepted in 2016 and 2017. The papers cover various topics in our field, ranging from acoustic analysis of vocal fatigue in sports coaches (by Connaughton and Yanushevskaya), target selection in speech intervention for children with speech sound disorders (by Baldwin and Gibbon), Parent Led Articulation Therapy in the area of cleft palate speech management (by Sweeney, Sell and Hegarty), to the investigation of perspectives of speech and language students regarding ethical dilemmas (by Power and Leonard).

Once again, I would like to invite members of the IASLT to submit to the Journal, to share the findings of your research projects!
