

Supplementary Material

Respiratory-Swallow Coordination in Individuals with Parkinson’s Disease: A Systematic Review and Meta-Analysis

Supplementary Table 1. Brief code for full-text study selection process

Full text screening				
“Respiratory-swallow coordination” mentioned	Participants	Evaluation	Intervention	Outcome measures
Yes (1)	Individuals diagnosed with PD (1)	RSC evaluation present (1)	RSCT present (1)	Swallow apnea/ respiratory-swallow phase patterning/ lung volume at swallow initiation present (1)
No (0)	Individuals NOT diagnosed with PD (0)	RSC evaluation absent (0)	RSCT absent (0)	Swallow apnea/ respiratory-swallow patterning/ lung volume initiation at swallow initiation absent (0)

Supplementary Table 2. Full codebook for full-text study selection process

Data items		
Descriptive codebook – 32 questions	Outcome codebook – 33 questions	Risk of Bias codebook – 17 questions
