

Keyword Index Volume 2 (2013)

+der(22)t(11;22) syndrome	37	cutaneous syndactyly in hand and feet	43
18p- syndrome	141	cystic fibrosis	1
20q13 deletion	157		
5p deletion	163	de Grouchy syndrome	141
6p deletion syndrome	103	developmental delay	163
		dyslipidemia	69
aCGH testing	25	dysmorphic features	157, 197
<i>ACVRL1</i>	181		
African Americans	120	Emanuel syndrome	37
allergy	91		
<i>AP4B1</i>	191	facial growth	9
array-CGH	147	Fanconi-Bickel syndrome	109
atypical development	157	filamin A	33
autosomal dominant	91	first and second pharyngeal arches	173
		FISH	147, 197
Bardet-Biedl	49	<i>FLNA</i> gene	33
Bardet-Biedl syndrome	77	free nucleic acids	1
BBS genes	77	frontal nevus flammeus	43
BBS proteins	77		
Brugada syndrome	97	gene variant	181
		genetic diagnosis	25
cardiovascular risk	69	genetic testing	25, 97
central nervous system anomalies	173	genetic variants	120
cerebral hemihypoplasia	43	genetics	9
CHARGE syndrome	103	glycogen storage disease type XI	109
<i>CHD7</i> mutation	103	growth retardation	113
child	91		
childhood	69	hereditary spastic paraplegia	191
chromosomal abnormalities	85	hereditary tubular disorders	133
chromosomal microarray	163	hyper-Ig E syndrome	91
ciliopathy	77	hypercalciuria	133
cleft lip	157	hypogonadism	49
cleft lip and palate	173	hypophosphatemic rickets	109
cognitive and behavioral impairment	53		
congenital anomalies	85, 173	<i>IGF1R</i> mutations	113
congenital cataracts	53	immunology	91
congenital malformation	85	infantile nephropathic cystinosis	129
corneal cystine crystals	129	inositol polyphosphate 5-phosphatase	53
cranial nerve palsy	173	insulin-like growth factor 2	120
Cri du Chat syndrome	163	insulin-like growth factor 2 receptor	120
<i>CTNS</i> gene	129	intellectual disability	147, 157, 191

low-molecular-weight proteinuria	133	peroxisomal biogenesis disorder	203
lysosomal storage diseases	129	polydactyly	49
		polymorphism	69
malocclusion	9	preimplantation genetic diagnosis	37
maternal measles antibodies	21	prenatal diagnosis	163
medical management	25	proximal tubulopathy	53
MeSH	91		
micro-array	25	race/ethnicity	120
microarray analysis	157	real-time PCR	1
microbial genome	1	retinal dystrophy	49
miscarriage	37	ring chromosome 13	147
misoprostol exposure	173		
molecular diagnosis	129	sex	21
monosomy 18p syndrome	141	sibling	49
mosaic 18p-/i(18q) syndrome	141	Silver-Russell syndrome	113
multiplex ligation-dependent probe amplification	163	<i>STAT3</i> transcription factor	91
mutation analysis	133	subfertility	37
neonatal	97	teaching hospital	21
nephrocalcinosis	133	trisomy 18q syndrome	141
nephrolithiasis	133	trisomy 8 mosaicism	197
newborn babies	21		
Nigeria	21	vein of Galen aneurysmal malformation	181
oculocerebrorenal syndrome	53	Warkany syndrome	197
<i>OCRL</i> gene	53		
oral facial genetics	9	Zellweger	203
oromandibular limb hypogenesis syndrome	43		
otopalatodigital syndrome type 2	33
