

Keyword Index Volume 7 (2014)

25-hydroxyvitamin D	179	dysostosis multiplex	159
504 Accommodation Plan	307	early effects	281
accelerometry	233	education	307
adolescent	197, 341	encephalomyelitis	267
adolescent health services	93	endocrinopathies	281
adolescents and emerging adults with special health care needs	3	exercises	273
adolescents with special health care needs	63	extension prosthesis	373
Affordable Care Act	71	facial asymmetry	295
allied health personnel	307	facial nerve palsy	295
bisphosphonates	125, 155	facial paralysis	295
bone	159	facial reanimation	295
bone density	143	facial rehabilitation	295
bone health	143	family burden	241
bone mineral density	111, 167	family dysfunction	241
brain tumors	281, 295, 307	family function	241
breathing exercises	255	fracture	133, 167
cerebellar mutism	333	glycogen storage disease type II	255
cerebral palsy	17, 53, 143, 219, 233	Guillain-Barre syndrome	267
child brain tumour	333	head injury	241
childhood disability	79	health care self-management	43
children	71, 179, 207	health care transition	3, 17, 43, 63
chronic conditions	33	health care transition model	3
clinician	307	health insurance	71
CNS tumors	307	hypothalamus	281
cognition	341	IDEA: Individuals with Disabilities Education Act	307
complications	323	IEP: Individual Education Plan	307
congenital limb deficiency	373	implementation science	93
consultation and referral	93	intellectual disability	93
continuity of care	79	interdisciplinary health team	197
coordinated care	79	intervention	307
CSF diversion	323	isokinetic	353
depressive symptoms	341	late effects	281
disability	71, 111, 143, 179, 207	lateral distal femur	111
disease-management	361	lived experiences	33
Duchenne	133	low magnitude mechanical stimulation (LMMS)	167
DXA	111, 125, 167		

lymphoedema	361	pituitary	281
lysosomal storage diseases	159	posterior fossa syndrome	333
		program development	93
malabsorption syndromes	179	public benefits	71
management: self-management	361		
MECP2	167	rehabilitation	197, 207, 255, 267, 323, 333
Medicaid	71	rehabilitation in tibial hemimelia	373
medical-legal partnership	71	respiratory distress	155
mental health	341	respiratory failure	155
motor delays	219	Rett syndrome	167
MRS	219	rickets	179
mucopolysaccharidosis	159, 353		
muscle	255	school reintegration	307
myelomeningocele	341	service delivery	79
		skeletal	255
neuromuscular	133	smile reconstruction	295
neuromuscular diseases	255	Social Security	71
neuropsychological evaluation	333	speech pathology	295
neurosurgical care	323	spina bifida	207, 341
		spinal muscular atrophy	133
obesity	207	strength	353
oral continence	295		
osteogenesis imperfecta	155	TBI	241
osteopenia	167	theoretical framework	3
osteoporosis	143	therapeutics	361
outcomes assessment	197	tibial hemimelia	373
		transition	33, 53, 71, 79
pain	197	transition to adult care	63, 93
pamidronate	155	traumatic brain injury	241, 307
parents	33, 341		
pediatric	307, 361	video gaming	273
pediatric brain tumor	323	vitamin D	179
pediatric onset chronic disease	43	vocational rehabilitation	71
pediatric osteoporosis	125		
pediatric rehabilitation	273	young adulthood	53
pediatrics	267	young adults	79
permanent denervation	295	young persons	33
physiatry	17	youth	71
physical activity measurement	233	youth with special health care needs	93
physical disability	93		
physician	307	Z-scores	167
