

Keyword Index Volume 8 (2015)

abstinence syndrome	157	curriculum	141
ACA	53	diffusion tensor imaging	283
acute	283	disabilities	23
adolescence	319	Down syndrome	3
adolescent care	39	emergencies	105
adolescents	3	emotion	319
adolescents with spina bifida	235	epilepsy	269
anxiety	343	executive functions	319
attention impairment	269	exercise	251
autism	3	factors affecting transition	13
balance	333	family caregiver	113
bone mineral density	251	family impact	75
brachial plexus neuropathy	167, 187, 219	fMRI	295, 307
brain imaging	319	FORAMENRehab	269
bronchopulmonary dysplasia	147	foster care	53
care coordination	39	functional goals	39
cerebral palsy	3, 251	functional magnetic resonance imaging	295
child	105, 283	future directions	31
child and adolescent psychiatric disorders	343	head injury	319
childhood acquired	39	health	23
childhood brain disorder	319	health care reform	53, 71
childhood onset	39	health care transition	31, 235
children and adolescents	333	health care-related transition	13
children with disabilities	131	health disparities	53
children with medical complexity	71, 75, 83, 97, 113	health policy	53
children with special healthcare needs	53	healthcare satisfaction	97
children with special needs	71	healthcare transition	39
chronic health conditions	31	health-related quality of life	83
chronic illnesses/conditions	3	hospital	157
chronic kidney disease	13	immigrants	53
chronic pain	97	independent living	23
college students	53	infant	157, 207
complex care	75, 141	insurance	53
complex childhood conditions	39	intellectual disabilities	3
complex chronic condition	131	international classification	167
computer-assisted cognitive rehabilitation	269	intervention	235
concussion	295, 333		
condition self-management	39		
criminal justice system	53		

joint capsule release	187, 219	quality improvement	39
limb anomalies	207	quality of life	75, 83, 97, 219
long-term care	53	readmission	131
mechanical ventilation	147	recurrent admissions	131
Medicaid expansion	53	rehabilitation	187
medically fragile children	147	research	31
mental health	97	resting-state networks	307
mild traumatic brain injury	269, 283, 295, 333	risk factors	131
mobility or gait	333	sleep	113
mTBI	295	social support	235
needs assessment	141	specialty hospitals	131
neonatal	157	spina bifida	3
newborn	157	splints	207
obstetric paralysis	167	systematic review	113
outcome	157	TBI	307
outcome assessment	167	technology dependent	113
parents	207	tendon transfer	187, 219
participation	207	tracheostomy	105
pediatric	295, 307	transition outcome	23
pediatric long term extended care facilities	147	transition readiness	13
pediatric rehabilitation	269	transition to adult care	3
pediatric systems	53	traumatic brain injury	343
pediatrics	113, 141, 187, 219	treatment outcome	167, 187, 219
physical activity	83	uninsured	53
physical therapy	187, 219	weaning	147
post-graduate trainees	141	working memory	295
predictors	131	young adults	3, 53
primary care	3		
quadriplegic	251
