

Erratum to: Bilateral vestibulopathy: Diagnostic criteria Consensus document of the Classification Committee of the Bárány Society

Michael Strupp, Ji-Soo Kim, Toshihisa Murofushi, Dominik Straumann, Joanna C. Jen, Sally M. Rosengren, Charles C. Della Santina and Herman Kingma

[Journal of Vestibular Research, 27(4) (2017), pp. 177-189. DOI: 10.3233/VES-170619]

On page 179, under section 3, “Diagnostic criteria for bilateral vestibulopathy”, where it reads:

Reduced horizontal angular VOR gain < 0.1 upon sinusoidal stimulation on a rotatory chair (0.1 Hz, $V_{max} = 50^\circ/\text{sec}$) and a phase lead > 68 degrees (time constant < 5 sec)

Should be:

Reduced horizontal angular VOR gain ≤ 0.1 upon sinusoidal stimulation on a rotatory chair (0.1 Hz, $V_{max} = 50^\circ/\text{sec}$) and a phase lead ≥ 15 degrees (time constant ≤ 6 sec)
