

Guide to Abstract Numbers

Abstracts for plenary lectures are designated by the alphanumeric PLxx where xx indicates the number of the plenary lecture. Abstracts for symposiums are designated by the alphanumeric SPxx-n where xx indicates the topic of the symposium and n indicates the number of the presentation in that symposium. The symposium topics are listed below. The symposium topics are listed below. Abstracts for oral presentations are designated by the alphanumeric OPxx-n where xx indicates the topic of the presentation and n indicates the number of the presentation within that topic. The oral presentation topics are listed below. Abstracts for poster presentations are designated by the alphanumeric PPxxx where xxx indicates the number of the poster presentation. Abstracts for satellite symposiums are designated by the alphanumeric SSxx-n where xx indicates the topic of the symposium and n indicates the number of the presentation in that symposium. The oral presentation topics are listed below.

Symposiums Topics:

- SP01 BPPV-Update & Controversies
- SP02 The Inner Ear Imaging
- SP03 Vascular Vertigo
- SP04 VEMP (Clinical) – Clinical Application of VEMPs
- SP05 Meniere’s Disease (Clinical) – Intratympanic Drug Application
- SP06 Vestibular Migraine
- SP07 Head Impulse Test
- SP08 Gait & Posture
- SP09 Video Head Impulse Test (Round Table)
- SP10 Basic Physiology of Vestibular Compensation and Adaptation
- SP11 The 3rd Joint Meeting of The Korean Balance Society and Japan Society for Equilibrium Research
- SP12 Vestibular Rehabilitation
- SP13 Vestibular Prosthesis
- SP14 Neurosensory Diagnosis and Prognosis of Mild Traumatic Brain Injury
- SP15 Genetics for Inner Ear/Vestibular Disorder
- SP16 Superior Canal Dehiscence Syndrome
- SP17 Vestibular Brain and Functional Imaging
- SP18 Spatial Orientation
- SP19 Meniere’s Disease (Basic) – Recent Progress in Revealing Pathologic Mechanism of Meniere’s Disease
- SP20 Visually Induced Dizziness; What Is It; Where Does It Come From; How Can We Deal With It?
- SP21 Vestibular Disorder and Autonomic Interaction
- SP22 BPPV-Pathogenesis
- SP23 Cochlear Implant and Vestibular Function
- SP24 Pathophysiologic Mechanism of Functional and Psychiatric Vestibular Disorders
- SP25 VEMP (Basic) – The Neural Basis of Vestibular Evoked Myogenic Potentials

Oral Presentations Topics:

- OP01 VEMP and Otolithic Function Tests I
- OP02 Vestibular Migraine
- OP03 Epidemiology
- OP04 Meniere’s Disease and Related Disorders I

OP05 Central Vestibular Disorder I
OP06 Perilymphatic Fistula and Superior Canal Dehiscence Syndrome
OP07 Benign Paroxysmal Position Vertigo I
OP08 Head Impulse Test I
OP09 Clinical Tests for Vestibular Function I
OP10 Ocular Motility: Physiology and Pathology
OP11 Functional, Psychiatric, Autonomic Disorders and Others I
OP12 Animal Models and Molecular Approach
OP13 Meniere's Disease and Related Disorders II
OP14 Bilateral Vestibulopathy and Vestibular Prosthesis
OP15 Meniere's Disease and Related Disorders III
OP16 Vestibular Neuritis
OP17 Anatomy and Physiology
OP18 Clinical Tests for Vestibular Function II
OP19 Gait, Posture, and Spatial Orientation I
OP20 Cochlear Implantation and Vestibular Function
OP21 Benign Paroxysmal Position Vertigo II
OP22 VEMP and Otolithic Function Tests II
OP23 Vestibular Compensation and Rehabilitation I
OP24 Vascular Vertigo
OP25 Functional, Psychiatric, Autonomic Disorders and Others II
OP26 Head Impulse Test II
OP27 Gait, Posture, and Spatial Orientation II
OP28 Vestibular Compensation and Rehabilitation II
OP29 Imaging of the Inner Ear and Vestibular System
OP30 Central Vestibular Disorder II

Satellite Symposia Topics:

SS01 Neural Coding and Multimodal Interactions for Action and Perception
SS02 Vestibular Periphery: Structure, Function and Restoration
SS03 Vestibular Plasticity and Adaptation
SS04 Neurophysiology of Vestibular Disorders and Treatments
