6 IOS Press has retracted the following content of its online content:

7
8
9 [Main Group Chemistry, 20(2), pp. 165-173, 2021, DOI: 10.3233/MGC-210022]

10 The Editor-in-Chief was contacted by readers about the allegation of improper citations in the article.
11 Investigation by the editorial office found that several references in the article do not support the
12 results and, in some cases, do not relate to the content of the article, as found by readers who shared
13 their findings in PubPeer.

14 Additionally, it was found that Figure 2c appears to be reused from other articles without proper
15 acknowledgment; hence it does not support the results as alleged in the paper.

16
17 The corresponding author informed the editorial office that the results in the paper could not be
18 confirmed, and that the article should be retracted.
