

Keyword Index Volume 37 (2015)

abandonment	315	cognitive therapy	235, 471
accidental falls	139	cognitive	471
activities of daily living	165	cognitive-communication	221
activity avoidance	139	communication disorders	69
acute	221	community discharge	173
affective brain computer interfaces (aBCI)	341	compensatory	471
ALS	69	continuous monitoring	3
ambulation	149	daily activities	359
amyotrophic lateral sclerosis	53	daily time management	379
anxiety	139	deglutition	299
aphasia	221	dementia	69
assessment	221	denomination	501
assistive device	53	depression	139
assistive technology devices	315	disability	165
assistive technology for cognition	359	discharge destination	173
assistive technology services	315	disease progression	139
assistive technology	213, 341, 393, 437, 471	disorders of consciousness	117
atrophy		driving simulator	35
Attention Network Test	25	dyslexia	405
attention	625	emotion regulation	89
attitudes	99	employment accommodations	425
auditory-divided attention	663	employment	437, 459
augmentative and alternative communication	69	equipment	53
augmented reality	35	errorless learning	437
automobile driving	35	executive function	563, 591, 639, 515
awareness of disability	379	exercise	25, 273
balance	225, 305	experiences	99
body composition	245	fatigability	25
Boston Naming Test	501	fatigue	25
braces	53	force generation	25
brain concussion	235	frontal lobe lesion	89
brain injuries	213, 235, 315, 437	frontal-lobe dysfunction	203
brain state classification	341	function	53
Brief Test of Attention	663	functional deficits	471
caregivers	117	functional mobility	3
case management	173	functional performance	245
central nervous system lesions	321	function-based	471
cervical deformity	299	gait disorders	321
clinical evaluation	165	gait	193
cognition	273, 437	generalization	437
cognitive assistive technology	379	hemiplegia	213
cognitive impairments	359	Hopkins Verbal Learning Test–Revised	699
cognitive support technologies	315, 437, 449, 459, 471		
cognitive supports	471		
cognitive symptoms	235, 425		

impairments	291	plasticity	11
individualized	471	positional release therapy	157
interdisciplinary	471	postpoliomyelitis syndrome	291
interventions	471	post-traumatic amnesia	221
		powered active lower limb exoskeleton	321
job retention	425	primary parkinsonism	263
		PRISMA	321
Latin America	493, 501, 515, 563, 591, 625, 639, 663, 677, 699, 719	processing speed	625
learning disorder	405	procrastination	379
literature review	359	progressive aphasia	69
		psychometric	493
maladaptive strategies	89	qualitative analysis	379
Matching Person and Technology Model	315	qualitative	117
Memory	719	quality of life	53
Memory Malingering	719	questionnaires	291
Matching Person and Technology	471		
methylphenidate	25	rasagiline	25
migraine headache	157	recovery	221
mild cognitive impairment	471	reference values	563, 591, 625, 639, 663
minimally conscious state	117, 393	rehabilitation	35, 53, 165, 181, 291, 471
modafinil	25	remediation	471
moderate cognitive impairment	471	repetitive transcranial magnetic stimulation (rTMS)	11
modified constraint-induced movement therapy	131	response inhibition	89
Modified Wisconsin Card Sorting Test	563	rest	235
motor imagery	263	Rey–Osterrieth Complex Figure	677
motor recovery	181	rheumatoid arthritis	299
motor symptoms	245	rhythmic auditory stimulation	193
multidisciplinary	471	robot therapy	181
multiple sclerosis	139, 149, 273, 425	rotator cuff	213
needs	99	secondary education	459
neurophysiology	11	selective attention	591
neuropsychological methods	405	semantic verbal fluency test	515
neuropsychological tests	493	service delivery	99, 471
neuropsychology	471	sexuality	99
neurorehabilitation	321	six-minute walk	149
non-invasive brain stimulation	11	social validation	393
non-motor symptoms	245	spatial visual process	305
nonuse	315	Speech Language Pathology	471
Nordic Walking	245	speech pathology	221
normative data	501, 515, 563, 591, 625, 639, 663, 677, 699	sports	235
Normative data	719	stimulation control	393
norms	493	stroke	165, 173, 181, 193, 273
		Stroop Color-Word Interference Test	591
occipitocervical arthrodesis	299	sublexical method	405
Occupational Therapy	471	supportive care	53
on-road driving	35	Symbol Digit Modalities Test	625
outcome	173	systematic instruction	437
		systematic review	35, 321
palliative care	53	tachistoscope software	405
paraplegic patients	321	therapeutic study	11
Parkinson's disease	3, 11, 25, 35, 225, 245, 273	therapy	471
patient-centered	471	three-dimensional gait analysis	263
phonological verbal fluency test	515	trail making test part A	203
physical fitness	149		

Trail Making Test	639	videoendoscopic examination	299
transcranial Direct Current Stimulation (tDCS)	11, 181	visual egocenter	305
transfer of learning	437	visual function	203
traumatic brain injury	99, 117, 221, 359, 449, 459	visual memory	677
treadmill walking	193	visual midline shift syndrome	305
trigger point	157	visual perception	677
trunk restraint	131	visual-spatial constructional ability	677
		vocational rehabilitation	437
ultrasonography	213	volition	379
upper limb	181		
upper-extremity function	131	walking speed	149
		walking	149, 291
vegetative state	117		
verbal learning and memory	699		
vestibular rehabilitation	255	yoked prisms	305
