SHOCK AND VIBRATION

Volume Contents • Volume 1 • 1993/1994

ISSUE 1

Foreword 1
Walter D. Pilkey

A New Algorithm for the Coupled Soil-Pore Fluid Problem 3
O. C. Zienkiewicz, Maosong Huang, Jie Wu, Shiming Wu

Modeling Accuracy in FEA of Vibrations of a Drumhead 15
Robert J. Melosh

Spectral Techniques for Nonlinear System Analysis and Identification 21
Julius S. Bendat

Optimum Resolution Bandwidth for Spectral Analysis of Stationary Random Vibration Data 33
Allan G. Piersol

A Frequency Domain Method for the Generation of Partially Coherent Normal Stationary Time Domain Signals 45
David O. Smallwood and Thomas L. Paez

Specification of Modal Participation Factors in Acoustic Scattering Problems 55
M. Ettouney, R. Daddazio, and F. DiMaggio

Excitation of Arch and Suspension Bridges by Subwires 59
Noriaki Hiwatashi, Yoji Mizuta, Yutaka Ishihara, and Itio Hirai

Pseudo Wigner-Ville Time-Frequency Distribution and Its Application to Machinery Condition Monitoring 65
Young S. Shin and Jae-Jin Jeon

Dynamic Stiffness Analysis of Curved Thin-Walled Beams 77
A. Y. T. Leung and W. E. Zhou

Analysis of Vibrating Timoshenko Beams Using the Method of Differential Quadrature 89
P. A. A. Laura and R. H. Gutierrez

Book Review 95
David O. Smallwood

Call for Papers: 65th Shock & Vibration Symposium I

ISSUE 2

Adaptivity in Crashworthiness Calculations 97
Ted Belytschko, Sang-Ho Lee, I-Sheng Yeh, Jerry I. Lin, Chen-Shyh Tsay, and James M. Kennedy

Derivation of Equations for Flexible Multibody Systems in Terms of Quasi-Coordinates from the Extended Hamilton's Principle 107
L. Meirovitch

Motion of a Rigid Body Supported at One Point by a Rotating Arm 121
Jeffrey D. Stoen and Thomas R. Kane

On Maximum Energy of Mechanical Systems Under Shock Disturbances 135
Dimitry V. Balandin

Calibration of a Hopkinson Bar with a Transfer Standard 145
Vesta I. Bateman, William B. Leisher, Fred B. Brown, and Neil T. Davie

Sensitivity of Eigenvalues to Nonsymmetrical, Dissipative Control Matrices 153
Vernon H. Neubert

Scaling for Shock Response of Equipment in Different Submarines 161
G. J. O'Hara and P. F. Cunniff

Finite Dynamic Elements and Modal Analysis 171
N. J. Fergusson and W. D. Pilkey

Review: Neural Networks in Mechanical System Simulation, Identification, and Assessment 177
Thomas L. Paez

Call for Papers: 65th Shock & Vibration Symposium I

ISSUE 3

Evaluation of Eigenvalue Routines for Large Scale Applications 201
V. A. Tischler and V. B. Venkayya

Free and Forced Vibrations of Periodic Multispan Beams 217
Liping Zhu, Isaac Elishakoff, and Y. K. Lin

Normal Form Analysis of Hopf Bifurcation Exemplified by Duffing's Equation 233
A. Y. Leung, Zhang Qichang, and Chen Yushu

Feasibility of a Transient Dynamic Design Analysis Method 241
Patrick F. Cunniff and George O'Hara

Effect of Surface Coatings on Cylinders Exposed to Underwater Shock 253
Y. W. Kwon, J. K. Bergersen, and Y. S. Shin

Transient Response of an Impacted Beam and Indirect Impact Force Identification Using Strain Measurements 267
Hyungsoon Park and Youn-sik Park

Actuator Placement in Multi-Degree-of-Freedom Vibration Simulators 279
Norman Fitz-Coy and Anindya Chatterjee

Plastic Deformation and Rupture of Ring-Stiffened Cylinders under Localized Pressure Pulse Loading 289
Michelle S. Hoo Fatt

Call for Papers: 65th Shock & Vibration Symposium I

ISSUE 4

Two Visually Meaningful Correlation Measures for Comparing Calculated and Measured Response Histories 303
Benjamin Whang, William E. Gilbert, and Stephen Zilliacus

Design of Damping and Control Matrices by Modification of Eigenvalues and Eigenvectors 317
Vernon H. Neubert

A Computer Program for a Canonical Problem in Underwater Shock 331
Thomas L. Geers and Teh-Hua Ju

On the Effectiveness of Using Only Eigenvalues in Structural Model Updating Problems 339
A. S. Nobari and D. J. Ewins

Power Spectral Density Conversions and Nonlinear Dynamics **349**
Mostafa Rassaian

A Method for Determining the Optimal Location of a Distributed Sensor/Actuator **357**
Byeongsik Ko, Benson H. Tongue, and Andrew Packard

Response of Launch Pad Structures to Random Acoustic Excitation **375**
Ravi N. Margasahayam and Raoul E. Caimi

Metallurgical Investigation of HSLA Steel Subjected to Underwater Explosion **385**
V. Bhujanga Rao, R. Rajendran, A. V. Jaykumar, and K. H. B. S. Satyanarayana

Eigensolution Derivatives for Arbitrarily Normalized Modes **395**
B. P. Wang

Book Review **401**
Allan G. Piersol

ISSUE 5

Construction of Benchmark Problems for Solution of Ordinary Differential Equations **403**
Sangchul Lee and John L. Junkins

Nonlinear Vibrations of Thin-Walled Composite Frames **415**
Ahmed K. Noor and Jeanne M. Peters

Noise Source Location Optimization **431**
Ed O'Keefe

Nonlinear Resonance Behavior in the Human Exposed to Whole-Body Vibration **439**
Suzanne D. Smith

Fully Coupled FE Analyses of Buried Structures **451**
James T. Baylot

Structural Synthesis in the Frequency Domain: A General Formulation **461**
Joshua H. Gordis

Feedforward Control of Gear Mesh Vibration Using Piezoelectric Actuators **473**
Gerald T. Montague, Albert F. Kascak, Alan Palazzolo, Daniel Manchala, and Erwin Thomas

Review: Vibration Isolation: A Review, I: Sinusoidal and Random Excitations **485**
F. C. Nelson

Book Review **495**
Eric E. Ungar

ISSUE 6

Exact and Direct Modeling Technique for Rotor-Bearing Systems with Arbitrary Selected Degrees-of-Freedom **497**
Shilin Chen and Michel Géradin

Characterization and Simulation of Transient Vibrations Using Band Limited Temporal Moments **507**
David O. Smallwood

Spectral Analysis of Large Finite Element Problems by Optimization Methods **529**
Luca Bergamaschi, Giuseppe Gambolati, and Giogio Pini

Optimal Location of Plate Damped Parts by Use of a Genetic Algorithm **541**
J.-L. Marcelin and Ph. Trompette

Vibrations of a Beam Moving Over Supports with Clearance **549**
H. P. Lee

Head Injury Reduction in Automobile Pedestrian Impact 559
David R. Lemmon, Ming-yi Wu, and Ronald L. Huston

An Improved Finite Difference Type Numerical Method for Structural Dynamic Analysis 569
Sung-Hoon Kim and Youn-sik Park

Book Review 585
Richard J. Peppin
