

Keyword Index Volume 18 (2004)

adsorption	519, 545	¹ H NMR spectroscopy	279
AFM	577, 587	¹ H	251
amino acids	177	hemoglobin	407
amphipathic helix	257	hemolysins	347
angiotensin II	251	high shear mixer	375
ANS binding	331	human heart valves	75
anti-inflammatory	485	hydrogen peroxide	347
apoptosis	415		
AT _{1A} receptor	251	<i>in vitro</i> dissolution	375
atherosclerosis	177	<i>in vivo</i> bioavailability studies	375
		inclusion complex	459
binding site	323	infrared spectra	67, 513
biocompatibility	597	infrared spectrometry	423
biodistribution	597	intrinsic fluorescence	331
biomaterials	587	ion exchange	519
bovine serum albumin	545	isoforms	347
cancer	597	lanthanides	251
cell membrane	415	limited proteolysis	227, 331
cell/material interactions	587	lipid chain length	257
cerium(III)	251	lipid content	423
chemical agents	67	lipid–protein interactions	407
CMC	257	local optical fields	433
cobalt	279	low density lipoprotein	177
condensation patterns	577		
conformational changes	331	magnetic resonance	597
conformational order	407	magnetoliposome	597
<i>Crotalaria cobalticola</i>	279	mass spectra	613
		mass spectrometry	347
data filtering	279	medical physics	67
deconvolution	423	melt pelletisation	375
denaturation	227	membrane	407
diagnosis	75	metabolomics	279
DNA	519	micelles	257
		microporous and nanoporous polymer films	577
electromagnetic field	513	modelling of drug-release mechanism	375
<i>Eisenia fetida</i>	347	molecular modeling	323
enkephalin	433	morphology	597
EQCM	545		
erythrocytes	407	necrosis	415
<i>Escherichia coli</i>	257	nicardipine	459
ester	485	NMR	227, 251, 257
		NSAID	485
Fourier transform infrared spectroscopy	323, 407, 415	orosomucoid	323
FT IR spectra	459	orthogonal signal correction	279
gas chromatography–mass spectrometry	177	paracetamol	375
glycosylation	347	partially folded state	227
gold	545	pattern recognition	279

pepsin	227	siderophore	453
peptides	433	silver colloids	433
polypyrrole	519	single molecules	433
porous polymer scaffolds	587	stratum corneum	423
principal components analysis (PCA)	75	sustained release	375
protein oxidation	177		
proteins	433	thermal dynamics	323
<i>Pseudomonas putida</i>	453	thiazolidinones	613
pyoverdin	453	titanium	545
		toxicity	279
quantitation	423	triacetyl- β -cyclodextrin	459
quartz crystal microbalance	545		
		variable temperature NMR spectroscopy	485
Raman spectroscopy	75, 323	vibrational dynamics	513
SAXS	227	wound healing	587
self-deconvolution	459		
SEM	577	XPS	519
SERS	433		
shift reagent NMR and molecular modelling	485	zymogen	227
