

Keyword Index Volume 21 (2007)

β -cyclodextrin	177	gadolinium	205
aluminium	257	Hartree–Fock	279
aluminium hydroxide	211	hemicelluloses	69
animal	183	hemolysis	105
antigen	211	human tissues	1
antigens	257	hydroxyl radicals	91
antimicrobial activity	61	hypocrellin A	235
apex myocardium	269		
apoptosis	105	imaging	183
atomic absorption spectrophotometry	161	imidazolidine-2-thione	61
avascular necrosis	227	inclusion complex	177
		infrared microspectroscopy	183
bovine serum albumin	53	infrared spectrum assignments	169
		inorganic substances	69
Ca ²⁺	43	intracellular calcium	121
calf-thymus DNA	193	iron	161
calibration	245		
cathodoluminescence	205	lactones	279
cationic vesicles	43	lignin	69
cell walls	69	liver	161
cellulose	69	luminol	135
cetirizine dihydrochloride	177		
chemiluminescence	135	membrane potential	121
chemotaxonomy	69	metalloprotein	143
chiral	143	micromechanical studies	69
cluster analysis	269	microspectroscopy	1
colloid	143	minerals	69
COSY	177	mitochondria	121
CP MAS NMR	61	MM	279
crystallinity	69	molecular chemistry	183
		molecular stress	69
diabetes	269	monovalent and divalent cations	193
diabetes mellitus	151	myoglobin	235
dipalmitoylphosphatidylcholine	43		
		nanoparticles	31
EDL	151	necrosis	105
electron paramagnetic resonance spectroscopy	235	necrotic bone	227
erythrogram	105	neural networks	269
		NMR	169
flow injection	135	NMR spectroscopy	177
fluorescence quenching	53	normal mode analysis	279
fluorescence spectroscopy	235	nuclear magnetic resonance	169
fluoroacetate	121		
Fourier Transform Infrared Spectroscopy (FTIR)	1, 91, 151, 169, 269	paeonolium	53
free radicals	91	peruphasmal	169
FT-IR microspectroscopy	227	pH	193
FT-IR spectra	279	photoluminescence	205
FTIR-ATR	211, 257	plant	183

plant fibres	69	spectroscopy	31
plant metabolites	69	structural biology	245
protein secondary structure	245	structural stability	257
protein secondary structure prediction	269	(sub)picosecond dynamics	193
pyridine nucleotides	121	sudan I	135
		swelling	105
quantitative methods	161	synchrotron	183, 227
quantum dots	31	Synchrotron Radiation Circular Dichroism spectroscopy (SRCD)	245
Raman	1	terpenes	69
Raman microspectroscopy	193	tissue compensator	205
ROESY	177	tissue damage	205
		triphenylphosphines	61
secondary structure	211	Two-Dimensional Fourier-Transform Infrared Correlation Spectroscopy (2D FTIR)	91
secretion	169	type I collagen	91
SEROA	143		
SERRS	143	ultraviolet emission	205
shrinkage	105	UV absorption spectroscopy	53
silica	69	UV-visible absorption spectroscopy	235
silver(I) complexes	61		
skeletal muscle	151	vacuum ultraviolet (VUV)	245
small-angle neutron scattering	43	validation	161
spectral diagnosis	1		
spectroscopic analysis	143
