Journal of Official Statistics

An International Review Published by Statistics Sweden

JOS is a scholarly quarterly that specializes in statistical methodology and applications. Survey methodology and other issues pertinent to the production of statistics at national offices and other statistical organizations are emphasized. All manuscripts are rigorously reviewed by independent referees and members of the Editorial Board.

The Review of Income and Wealth

The Review is published quarterly by the International Association for Research in Income and Wealth (IARIW). It specializes in the areas of national accounts estimation and analysis; social accounting; microdata analysis of issues related to income and wealth; development and integration of micro and macro systems of economic, financial, and social statistics; international comparisons of productivity, income, and wealth; and related problems of measurement and statistical methodology. As a journal with an international readership, emphasis is placed on (1) studies of methodological interest, and (2) comparative analyses of more than one country.
