Technology and Health Care 21 (2013) 667–670
IOS Press

Keyword Index Volume 21 (2013)

16s bacterial DNA 87

abdominal surgery 1
Accelerometer 345
acceptability 547
accidental flush 581
acitretin 265
active and healthy ageing 169
active contours 199
adaptive video-games 97
adhesive capsulitis 265
adults 233
aerobic capacity 157
aging 587
alcohol use disorder 31
all-polyethylene 81
amputation 261
angiogram 407
antetorsion 631
antibiotics 233
arthroscopy 265
artificial neural network 345, 557
assistive robots 217
astronauts 285
atherosclerosis 241
atherosclerotic plaque 199
autograft 315
automatic monitoring 387
automatic thresholding 199

battery-aware design 455
behavior modeling 323
biobanking 183
biomechanics 369
biomodel 305
body scheme 97
bone 587
bone graft 315
business continuity management 49

cardiovascular diseases 241
cardiovascular implantable electronic devices infection 87
change management 469
children 547
children primary care 233
chronic diseases 173
classification 199, 417
clavicle fracture 143
clinical practice guidelines 113
cognitive assessment 387
cognitive impairment 217
colonialisation 87
community health workers 113
computational biomechanics 271
computed tomography 441
computer simulation 441
computer-assisted navigation 631
constitutive analysis 271
coronary artery 357
cosmic radiation 285
cost drivers 125
cost models 183
critical ill patient 1
CRP 233
CT 441
cutaneous T-cell-lymphoma 265

days of treatment 173
dementia 323
depression 31
diabetic retinopathy 557
dose modifiers 285
dose reduction 441
